PROFESSIONAL PROFILE

Cyber Security MSc graduate with over three years of experience in web development, WordPress and QA testing, supported by practical cybersecurity projects. I have worked on website development, testing, troubleshooting and security-related tasks, and I enjoy finding problems and working out practical solutions. My MSc work has given me hands-on experience with security analysis, threat detection, vulnerability testing and network analysis. I was Runner-Up in the UWS Cyber Security Hackathon 2025 and have led the UWS London Cyber Club. I am open to junior roles in Cyber Security, IT, SOC/Incident Response, QA/Software Testing and Web Development across the UK.

CORE SKILLS

Cyber Security (basics)	Threat detection, penetration testing, vulnerability assessment, cyber risk analysis, malware analysis, security testing, incident response fundamentals, network security
Security & Network Tools (basics)	Nmap, Wireshark, Snort, Volatility, Autopsy, Linux/Kali Linux, Windows, command-line troubleshooting
Web & Application Security	Web vulnerability testing, secure configuration, WordPress security, vulnerability identification
Web Development	WordPress, WooCommerce, HTML, CSS, responsive design, Elementor, WPBakery, UX Builder, ACF, shortcodes, Shopify, SEO
QA & Testing	Manual, functional, performance, security, regression/retesting, responsive and cross-browser testing; test case design
Programming & Technical	Python, Git/GitHub, sockets, REST/API concepts, database setup and migration, FTP, Figma
Professional	Problem solving, teamwork, time management, adaptability, client communication, project coordination, mentoring

PROFESSIONAL EXPERIENCE

UWS London Cyber Club - Cyber Club Lead | Sep 2025 - Present | London, UK

- Lead cybersecurity workshops, ethical hacking activities, guest sessions and student events.
- Coordinate club activities and support collaborative, hands-on cybersecurity learning.
- Encourage knowledge sharing around current cybersecurity tools, threats and security practices.

Redspark Technologies - WordPress Developer | Dec 2024 - Apr 2025 | India

- Developed and maintained WordPress websites using themes, plugins, ACF, shortcodes and responsive layouts.
- Worked with FTP, Figma-to-WordPress workflows and live, staging and local environments.
- Supported website customisation, troubleshooting and implementation of client requirements.

WeblogySphere Pvt. Ltd. - Web Developer | Sep 2023 - Dec 2024 | India

- Managed website development through deployment, including design updates, bug fixing and responsive improvements.
- Set up and migrated databases and websites between local, staging and live environments.
- Supported website launches and checked functionality across devices and browsers.

Analyt Solutions - Web/WordPress Developer & QA | Jan 2023 - Sep 2023 | Remote/India (US based)

- Built and customised WordPress websites using Elementor, WPBakery and other visual page builders.
- Created and executed manual, functional, performance, security and responsive test cases.
- Investigated defects, retested fixes and worked with teams during sprint delivery.

- Supported SEO checks, website troubleshooting and cross-team communication.

Getmeonline Internet Excellency - WordPress Developer | Mar 2022 - Dec 2022 | India

- Developed and customised WordPress websites using Elementor, WPBakery and UX Builder.
- Worked on WooCommerce, Shopify, website hosting, staging, templates and product listings.
- Communicated with clients to understand requirements and deliver website changes.

A J Group of Company - WordPress Developer | Jan 2021 - May 2021 | India

- Set up WordPress databases using XAMPP and installed themes and plugins.
- Customised WordPress pages and supported website design and configuration.

SELECTED PROJECTS

Browser Fingerprinting Analysis & Web Privacy Risk Assessment - MSc Project

Machine-learning-based analysis of browser fingerprinting and web privacy risks, focusing on evolving tracking techniques and WebAssembly-related obfuscation. Evaluated classification performance and concept-drift behaviour.

Vulnerability & CVE Scanner

Python security tool combining Nmap scanning with NVD API lookups to identify services and map findings to CVEs/CVSS severity, with automated reporting.

Web Vulnerability Scanner

Python-based reflected XSS testing tool using Requests and BeautifulSoup, including form detection, payload injection, session handling and reporting.

Encrypted Chat Application

Multi-client Python socket application using AES-256 encryption, secure IV generation, threading and client-server communication.

TCP Port Scanner

Python-based TCP scanner using sockets and threading to identify open, closed and filtered ports, with logging and command-line options.

EDUCATION

MSc Cyber Security | University of the West of Scotland, London Campus | 2025 - 2026

BEng / BE Computer Engineering | Vadodara Institute of Engineering, Kotambi, Waghodiya | 2018 - 2022 | CGPA 7.71

ACHIEVEMENTS & CERTIFICATIONS

- Runner-Up - UWS Cyber Security Hackathon 2025, University of the West of Scotland.
- UWS London Cyber Club Lead - led cybersecurity learning activities, workshops and student events.
- Cyber Security Internship - certification listed in LinkedIn profile.
- Front End Development - HTML - certification listed in LinkedIn profile.

ADDITIONAL INFORMATION

- Languages: English, Hindi, Gujarati.

- Open to entry-level and junior opportunities across Cyber Security, IT, SOC/Incident Response, QA/Software Testing and Web Development in the UK.
